

# Emphasis is placed on security. Forgery-proof Linhardt packaging with **SECUTAG®**.

Linhardt develops problem solving with **SECUTAG®** for their customers and provides safeguarding originality for packaging and complete packaging systems.

Product piracy and counterfeiting are not a small matter any more. The worldwide annual losses in sales caused by plagiarism amount to estimated 200-300 billion Euros. The companies' damage which arises from losses in image or from unjustified product liability claims can hardly be numeralised. Deciding on a forgery-proof and distinctive marking of your products is more than a need of the moment.

Therefore, **Linhardt** opted for optimal safety for their customer's premium products. With the innovative system **SECUTAG®** the Linhardt packaging becomes forgery-proof. Uncompromisingly, with a minimal operating complexity the global player Linhardt deploys, according to a customer's specification, the unique colour code particles as well on aluminium-cans and -pill tubes as on tubes of aluminium and plastic.

This unambiguous verification of the originality provides for optimal forgery-proof security of their customer's products.

At a glance:  
The advantages of the **SECUTAG®** protected Linhardt tubes:

**SECUTAG®** is the invisible and reliable protection to combat product piracy.

**SECUTAG®** can be imprinted to all Linhardt product lines.

**SECUTAG®** is even accepted as decisive evidence in court.

**SECUTAG®** stands for the containment of illegal surplus production.

**SECUTAG®** identifies distribution channels – without gap and traceable.

**SECUTAG®** means optimal defence against unjustified claims of product liability.

**SECUTAG®** provides security against counterfeit in all industrial sectors.
